

COMPANY PROFILE

2020

OUR **VISION**

The combined power of cloud computing and secure application services will create a responsive IT ecosystem.

OUR **MISSION**

Provide high-quality API Management and Unified Communications products and professional services.

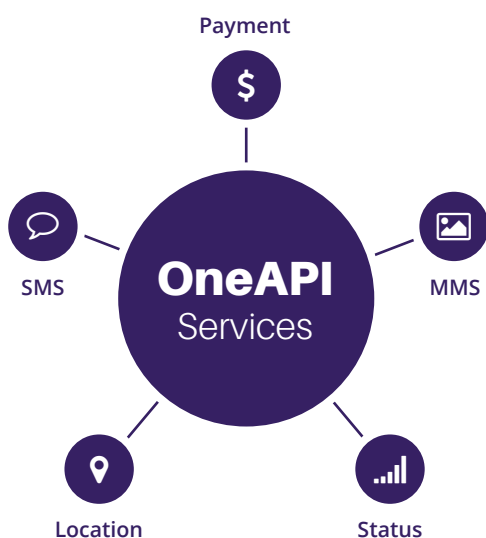

OUR **STRATEGY**

Lead the adoption of secure cloud access and network convergence technologies.

Our Products

Carrier-grade implementation of low-level telecommunications protocols exposed to third-party applications as OneAPI services. Pluggable into API Management platforms.

Protocol Adapters

Diameter Adapter

Diameter Adapter is a Java-based implementation of Diameter-compliant Credit-Control Application interfacing an *Online Charging System (OCS)*.

SMPP Adapter

SMPP Adapter is a Java-based implementation of Short Message Peer-to-Peer (SMPP) protocol that enables SMS transfer between *External Short Messaging Entities (ESME)* and a *Short Message Service Centre (SMSC)*.

MM7 Adapter

MM7 Adapter is a SOAP-based implementation of Multimedia Messaging 7 (MM7) protocol that enables MMS transfer between *Value-added Service Providers (VASP)* and a *Multimedia Messaging Service Centre (MMSC)*.

MLP Adapter

MLP Adapter is an HTTP-based implementation of Mobile Location Protocol (MLP) for receiving geographical position and distance of mobile terminal devices from a *Gateway Mobile Location Centre (GMLC)*.

MAP Adapter

MAP Adapter is an HTTP-based implementation of Mobile Application Part (MAP) protocol for receiving network connection status of mobile terminal devices from a *Gateway Mobile Switching Centre (GMSC)*.

Protocol Adapter	OneAPI Service
Diameter Adapter	Payment
SMPP Adapter	Short Messaging
MM7 Adapter	Multimedia Messaging
MLP Adapter	Terminal Location
MAP Adapter	Terminal Status

COMMON FEATURES

- REST interface with JSON and XML format.
- Schema validation and error handling.
- High Availability with clustering.

The complexity of low-level telecommunications system integration is hidden behind the implementation. Modern enterprise and mobile applications can take advantage of convenient OneAPI interface to enable service charging, mobile messaging, location awareness and network connection status check for wireless subscribers.

Our Services

Professional Services

Strategy and Architecture

Our proficiency in all domains of *Enterprise Architecture* is based on decades of experience that each of our consulting professionals is proud to present and apply in your specific technical environment.

Complete Solution Delivery

Our cloud architects, application platform specialists and enterprise software developers have a proven track record of delivering IT solutions in cloud-based, on-premise and mixed environments.

Operations and Support

We will help you improve efficiency through the adoption and optimization of modern *Continuous Delivery* tools and processes that reduce the time between committing and provisioning a system change.

Solutions

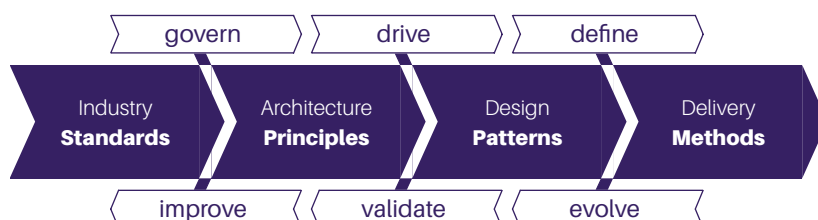

- ◆ *Cloud Enablement* — cloud migration and service access.
- ◆ *Enterprise Architecture* — IT strategy, guidelines and design.
- ◆ *Application Integration* — API management and governance.
- ◆ *Information Security* — single sign-on, access and auditing.
- ◆ *Continuous Delivery* — automated build and deployment.
- ◆ *Data Analytics* — data mining, processing and reporting.

Our Professional Services will help transition your organization IT to modern cloud platforms and converged communications. We are privileged to present a proven track record of successful strategic guidance and high-profile enterprise solution delivery and support.

Industry	Revenue Share
Telecommunications	45%
Banking & Financial Services	20%
Transportation & Logistics	10%
Government Services	15%
Retail & Consumer	10%

Agile Solution Delivery Approach

UNIQUE SKILLS

Whether your organization is looking to understand how to benefit from Cloud Computing, adopt API Management or transition to Unified Communications, we are well-prepared to deliver low-risk, secure and innovative solutions based on the leading-edge technologies.

We provide post-production support for cloud and on-premise applications.

100%
Success
